Dr. Hanout is currently practicing as a vitreoretinal surgeon at Apex Eye Institute and Western Memorial Regional Hospital. He joined the Department of Ophthalmology at Western Health, Newfoundland as a vitreoretinal surgeon in June 2019, moving from Toronto. His journey through ophthalmology training has been diverse with important stops at world-renowned institutions. He completed his Ophthalmology Residency in Egypt (2005-2010) and then practiced as attending ophthalmic surgeon for two years.

In 2012 he moved to the USA to start a one-year clinical/research fellowship in the Diseases of the retina and Uveitis at the Wilmer Eye Institute of the Johns Hopkins University. Following which, he moved to the Stanley Truhlsen Eye Institute of the University of Nebraska Medical Center for two years as a Postdoctoral Research Associate and Clinical Trials Manager where he was overseeing large interventional clinic trials and working with major medical regulatory bodies in the USA including the FDA.

In 2015, Dr Hanout moved to Canada and started a two-year Vitreoretinal Surgery fellowship at the University of Toronto - St. Michael's Hospital, during which, he had intensive high-volume surgical training in the management of vitreoretinal disorders ranging from straightforward to the most complex cases in one of the largest centers in Canada. Finally, he concluded his sub-specialty training in ophthalmology with a two-year surgical fellowship in Ocular Oncology at the University of Toronto - Princess Margaret Hospital.

Dr. Hanout authored and co-authored over 30 publications between original investigations, case reports, novel surgical techniques and book chapters.

He received multiple awards in acknowledgement of his achievements including "Silver-U" award from the University of Nebraska Medical Center and two Rhett Buckler awards from the American Society of Retina Specialists.
