## Atlantic Eye Symposium

Pradeep Ramulu, MD, MHS, PhD is an Associate Professor of Ophthalmology and Epidemiology at Johns Hopkins. Dr. Ramulu completed his MD and PhD degrees at the Johns Hopkins School of Medicine, and received his MHS from the Johns Hopkins Bloomberg School of Public Health. He completed his ophthalmology residency at the Johns Hopkins Wilmer Eye Institute, and a glaucoma fellowship at the Bascom Palmer Eye Institute in Miami.

Dr. Ramulu's clinical focus is in the medical and surgical care of glaucoma, with an emphasis on complex and secondary glaucoma. His research interests primarily relate to the impact of vision loss on the individual, specifically with regards to important functional outcomes such as reading, mobility, and self-reported outcomes. Secondary research interests include angle closure glaucoma, formalized evaluation of resident/fellow education, and the relationship of ocular measures to cognitive outcomes. Dr. Ramulu has been continuously funded by the NIH as a principle investigator since 2009, and is current the principle investigator of a longitudinal study designed to identify reversible risk factors for falls amongst older adults with glaucoma. He also receives both salary and research support to generate and apply novel methods of resident education.

Dr. Ramulu has published over 60 peer-reviewed publications, and has received numerous awards including the Academy of Ophthalmology's Secretariat and Achievement awards, as well as the L. Harrell Pierce Teaching Award.
